

ABLOY® CONCEALED
PRODUCTS FOR
INTERIOR DOORS

INVISIBLE AND SILENT CONVENIENCE

Adding value to the use and design of any interior door has never been this subtle – ABLOY CONCEALED PRODUCTS make a difference that you cannot see or hear.

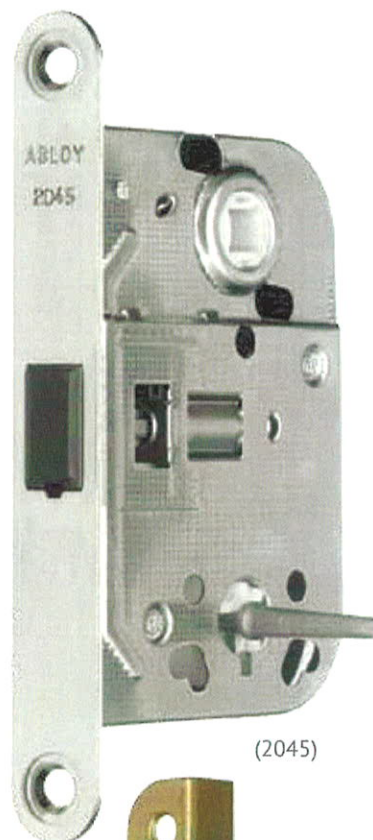

ABLOY CONCEALED PRODUCTS mean that no protruding bolts, striker plates or door hinges are needed. The aesthetic benefits are self-evident. Yet, perhaps the greatest benefit one can discover only by use: opening and closing the door is virtually silent, thanks to the magnetic lock. What remains unaltered, when compared to other Abloy products, is reliability.

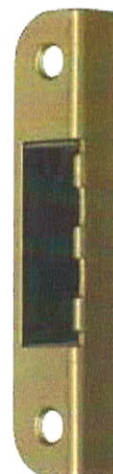

FUNCTIONING

When the door is closed, the magnetic force between the bolt and striker plate keeps the door firmly in place without the bolt contacting the striker plate. This makes the door silent to use.

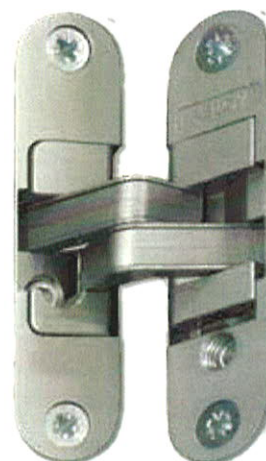

When the door is open, the bolt is in line with the fore-end, and therefore practically invisible.
